Issue Number 18
27th January 2017

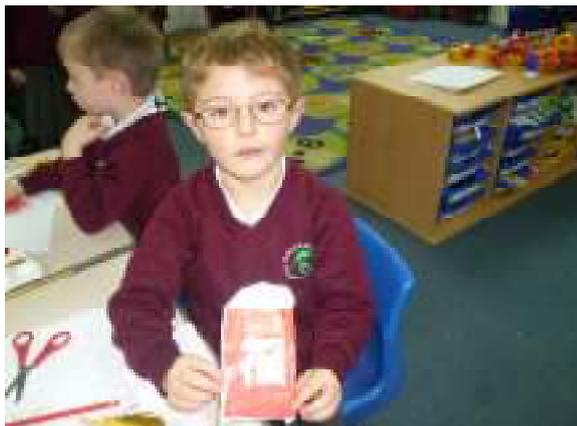

Continuing the Learning Journey!!

This week the children have been talking about making healthy food choices. They then made their own healthy sandwiches and ate them in the classroom!

Every year we incubate and hatch chickens in class. This is such a wonderful experience for the children but because we are so successful I have 13 chickens living in my garden! This year I am asking beforehand if any parents would be willing to home the new chicks we hatch. They are a huge responsibility though and we would need to have a chat if you think you would be able to help.

This week's learning focus:

- The children wrote instructions for making a sandwich - they are experts now!
- The clay animals have now all been beautifully painted, they are ready for home but some are very delicate.
- The children listened to the story 'Biscuit Bear' then designed and made their own bear using play dough and various art materials.
- The children listened to the Chinese New Year story and made lucky wallets and coins.

Focus on Learning

Next week we will be learning about positional language and how animals stay warm in winter. The children have really enjoyed making fruit salads and healthy sandwiches this term, in a few weeks we will be making pancakes too! If possible, we would really appreciate a voluntary contribution of £2 to cover the cost of the ingredients.

Many thanks in advance

Special Star Learners

Alina – for brilliantly building and constructing animal enclosures for the small world animals!

Sophia – for carefully blending sounds together to read!

Information for Families

Next week we have 2 days of non-stop science activities planned (Tuesday and Wednesday). The children will be taking part in a workshop, participating in many experiments and having lots of learning fun!

Many thanks,
The Chestnut Team
