

We're ready to go on holiday! We know all about how to pack depending on what time of year it is (we are hoping there will be a holiday coming up!), we know the days of the week, months of the year and seasons.

## Our Learning Journey

We have spent some time reflecting on what we do on each day of the week as it helps us remember which day it is. We are also becoming aware of the weather patterns and know how this helps us spot which season we are in.

Days, months & seasons

In science we are beginning to look at trees and how they change with the seasons.

We have spent some time learning about our local area through searching on Google.

Getting to know Google

We have spent some of our maths learning how to identify coins and spend money. We know that £2 will buy us a lot more than 2p - maybe we could take you shopping at the weekend to put our new knowledge to practice!

Money, money, money!

We know that Remembrance Day is to reflect on those who have lost their life or loved ones at war, so we spent some time thinking about all the people special to us. We wrote about a special moment we have shared with them and put their photos in the class poppy field...

## Star learner this week is...

**Brandon!**

You have shown a great love for learning this week in your proactive attitude to tricky challenges. You are courageous!

**Well done Brandon!**

## Reminders to Families

**Phonics Castles:** Please sign off if your child is ready and can write these words in sentences

**Nativity:** Letters will go out in the post today. Please take note of your child's part and costume.

*Many thanks,  
Mrs MacCormack*
