

The children have had a great time exploring the classroom this week as Shape Detectives! They have also spent some time reflecting on those who are close to them as we spent a moment's silence for Remembrance Day today.

Our Learning Journey

In maths we've been learning about Venn charts and how to identify sorting 2D and 3D shapes...

... and we have designed our own symmetrical fireworks displays. This was great fun and we can't wait to be adults and have a go at the real thing - but don't panic, we've learnt about Firework Safety too!

We've reflected upon important memories as part of our Remembrance Day and created our own poppy field and photo frames to help remind us of special people...

POP! BANG! CRACKLE! We've written some amazing firework poems using onomatopoeia (and one or two of us can even remember this tricky word!). We are also proud to say we have published our first class book 'Cedar's Firework Poetry'. Here's a snippet...

Star learner this week is...

Lucas F

You have shown great courage in music this week, being brave and performing some amazing actions to our songs!

Well done Lucas!

Reminders to Families

Home Learning: Please return on Mondays
Library Books: Some children are choosing library books to take home to read. They are free to choose anything that gives them enjoyment even if it is a book that you need to read to them - it's all about 'Reading for Pleasure'. Please be careful not to confuse these for their reading practice books!

*Many thanks,
Mrs MacCormack*
