

YEAR 1 WEEKLY LEARNING

Ongar Place Primary School, Addlestone, Surrey 01932 842785

16th September 2016

The children have spent this week getting to grips with the resources we use for our literacy and maths. We are all (teachers included!) now feeling settled and calm in our new 2016-17 class.

Our Learning Journey

In literacy this week we have explored our existing knowledge of sounds and used them to help us spell new and tricky words. We have also spent time thinking about how to sequence sentences and stories so they make sense.

In maths we have used our time to explore the resources around the classroom and we now know we can use any of these to help us whenever we need to. If you want to pop in and see the resource wall then feel free, these things might help us at home too. We have amazed Mrs MacCormack with our ordinal number counting (first, second, third, etc.) and counting on and back to 20.

In science this week things got rather messy: Mrs MacCormack likes to get crafty so we had to warn her that this can cause a lot of mess.

It's a good thing we are all very good at cleaning up after ourselves! We learnt about different materials and what is most suitable to build a house from, then we built our own. We impressed ourselves with such amazing team-work too!

We learnt a little more about 'Peace' in our assembly this week. We are very proud of our display...

Star learner this week is...

Eric!

Eric has shown great attention this week, especially when we were learning about e-safety in computing. He knows why we have to be very careful when playing online computer games and going on websites.

Well done Eric!

Reminders to Families

We are always up for some up-cycling... If you'd like to donate your recycling (bottles, cardboard, chocolate boxes, etc.) please ensure they are washed in a bag

*Many thanks,
Mrs MacCormack*
