

Year Two Learning Letter

Ongar Place Primary School, Addlestone, Surrey 01932 842785

3rd February 2017

Learning Journey

We had so much fun during our science days!! We linked our science to our Frozen learning and carried out an investigation to see how we could melt Elsa's frozen hands. We made predictions before we started. Some of us thought that sawdust would melt Elsa's hands quickly because if it keeps rabbits and guinea pigs warm then it will warm her hands. Others disagreed and thought that salt would be good because we put salt on the paths when it is cold so it must be good for melting ice. Fab ideas year 2!

We weren't very popular with Mr Fuller when he saw what a mess we had made of our classroom, oops!! But we had a great time investigating what happens when you mix cornflour with water.

Star Learners

Well done Year 2, your behaviour during our science workshop was fantastic! Mrs Cheney and Mrs Marwick haven't forgiven you just yet though for shooting us with the smoke cannon!

Next week we will be writing recounts in English.

We will be using all of the shoe boxes we have to get messy making our small worlds.

Information for Families

Thank you for all the shoe boxes you have sent in. We now have enough to make our frozen small worlds.
