

Year Two Learning Letter

Ongar Place Primary School, Addlestone, Surrey 01932 842785

4th May 2018

Learning Journey

Even though it has been a shorter week, we have still fitted lots of learning in.

In Maths we have used the greater than, less than and equals sign to compare numbers and solve problems about inequality. We have also practised placing numbers onto blank number lines.

In English we read the quest story 'The Way Back Home' by Oliver Jeffers. We have been thinking about how interesting vocabulary can help the reader imagine a setting and writing our own noun phrases to go with different settings.

In Science we have been learning about how plants can be grown without soil and why this might be useful. We have created our own hydroponic farm in the classroom and will hopefully be able to grow some broad bean plants.

In RE, we have started learning about Islam. This week we learned about why Muslims consider Allah and the prophets so special. We thought about people who we admire and tried to explain why they are important to us.

Star Learners

Brandon was able to explain to the class why David Attenborough was a special person for him.

A special 'Well done' to the children who went to Jubilee High School last Friday to take part in the STAR partnership Infant Music Festival. Your singing was great and you represented Ongar Place beautifully.

Information for Families

Monday 7th May - Bank Holiday
