

Year Two Learning Letter

Ongar Place Primary School, Addlestone, Surrey 01932 842785

4th November 2016

Learning Journey

This week in Maths we have been measuring length. We began by measuring ourselves using decimetres before moving on to measure smaller objects in centimetres. We have also been learning to solve word problems involving length.

In Science we helped Mrs Marwick to choose the best material for mopping up spilt water by carrying out an investigation. We predicted which paper would be the most absorbent and then observed how well they soaked up the water we poured on them.

Focus on Values

This half term our value is **Responsibility**. In class we have been thinking about the different things we are responsible for at school. If we all take responsibility, we can make sure our class is a great place to learn.

Star Learner

Our Star Learner this week is Jayden for trying hard with his reading and telling us about the book he is reading.

In English, we read the story 'The Shopping Basket'. We acted the story out in groups and tried to recall the parts of the story in the correct order. We used the story to help us write lists and instructions.

We also enjoyed pretending to travel to different countries in our 'Around the World' workshop on Wednesday.

Information for Families

As the weather gets colder, please make sure your child has a coat in school for playtime.

Monday 17th November - Pizza Express visit
