

# YEAR 4 WEEKLY LEARNING

Ongar Place Primary School, Addlestone, Surrey 01932 842785

29th June 2018

## Our Learning Journey

We have been learning the eight points of the compass in geography this week. We have used them to describe position, find places on maps and direct movement. We used atlases to find towns and cities in England.

We spent some time in the shade to use compass points to direct each other.

Although we all like the sunshine, we decided that it was cooler doing our reading in the shade!

## Focus on Learning

This year is going so quickly! We are all very excited that next week we shall be spending time in the classes we will be part of in September. We will spend Monday, Tuesday and Wednesday mornings experiencing Year 5 and getting to know our new teacher and teaching assistant.

## Star Learners

Oliver for working very hard in maths this week.  
Well done!

## Information for Families

Let's hope this lovely weather continues, please send in a water bottle and if your child would like, a hat.

Enjoy the weekend.  
Mr Good and Mrs Meade
