

YEAR 5 LEARNING NEWS

Ongar Place
Primary School

Spring 29th February 2019

Some pictures

This Week...

In English this week we started an exciting new unit of learning—SHAKESPEARE. We started by researching some basic biographical details about the man. We then started to look at some of the 'scary' language and tried to translate some speeches into more easily understood language. We used a translator to change modern phrases into Shakespearean language. Finally, we read and watched an animation of Romeo & Juliet and tried to summarise the story.

In maths we have grappled with improper fractions, mixed numbers and learned how to simplify fractions.

We also started our new DT topic. This term we are cooking. We will be researching, learning about food labelling, healthy diets and of course cooking.

After our class assembly you can't keep us off the stage as we presented our air pollution results in an assembly. Our results were very interesting.

Ambassadors of the Week

Ralph—shared an excellent idea about how to reduce the impact of air pollution on the motorway bridge.

Queenie— who quickly understood how to use 4 - figure grid references,

Information for Families

Next week, as part of our Science curriculum, we will be covering changes that happen during puberty
