

YEAR 5 LEARNING NEWS

Ongar Place
Primary School

Autumn 9th November 2018

Some pictures

This Week...

In English we have moved to a new unit of learning about persuasion. We have read two picture books that have a common theme and tried to analyse how they are persuasive. What techniques do authors use?

As part of our Statistics learning we needed to learn about telling and calculating with time. So, this week we have been reviewing time. This has been with analogue, digital and 24 hour.

In Science this week we have started a new unit of learning about Earth and Space. We started by thinking about how we know that the Earth is a sphere. We then compared the sizes of the Moon, Sun and Earth. It is just as well we know our place value. There were some very big numbers.

We also had some visitors this week. Chertsey Museum came to talk to us about WWI and the local effects in Addlestone.

Ambassadors of the Week

Ralph— who was very knowledgeable and interested in science this week

Harry — who participated more in lessons this week providing answers, thoughts and opinions.

Information for Families

Family Learning day—16th November
Community Activity Day—19th November
Bikeability—22/23 November
