

# YEAR 5 LEARNING NEWS

Ongar Place  
Primary School

Autumn 12th October 2018

## Some pictures

## This Week...

In English, we have been looking at how we can make our writing more cohesive and interesting for the reader. We have explored the use of adverbial phrases and noun phrases both of which give the reader more information. We have practised writing dialogue, using inverted commas, and tried to combine all this in an autobiography.

Addition and subtraction have been the focus for maths. We have been trying to use number lines to help us add and subtract powers of 10. This has meant we have also been reviewing knowledge of place value.

With Mrs Brown we designed prayer mats as we learned about the role of prayer in Islam. We also thought about some questions we could ask when we visit the mosque next week.

In Science we investigated irreversible changes. We made mixtures and observed the results. It was very exciting and certainly supported the STEM assembly we had earlier in the week.

## Ambassadors of the Week

**Camran** — for sharing his knowledge and understanding of Islam

**Charlie**— for working hard to punctuate dialogue correctly.

## Information for Families

**Mosque Trip on Monday**  
**Parent's Evenings next week.**
