

YEAR 5 LEARNING NEWS

Ongar Place
Primary School

Summer— 17th May 2019

Some pictures

This Week...

This has been an odd week—5 days!

In English we have been trying to let our imaginations go and turn the ordinary into the extraordinary by using different techniques to create an amazing poem.

In Maths we have focused on converting fractions to decimals and to percentages. We've also calculated percentages and rounded decimals.

In Science we have explored the force of friction and investigated where friction is high and low.

We have also sung quite a bit. We recorded our new single, for our new CD, which will be out soon.

We have also had fun with QR codes. We played a scavenger hunt and then created our own QR code.

Who knew you could fit so much into 5 days.

Ambassadors of the Week

Ralph—who asked lots of interesting questions in science.

Rosie - who completely understood how to construct pie charts

Information for Parents

Next week—local history week. Whole school trip on Thursday. Term will end at normal time on Friday.
