Autumn 17th November

### Some recent pictures...

### This Week...

We started a new unit of learning about recounts. We read some 'Confidential Documents' that recorded a UFO sighting. We analysed the documents to establish the features of recounts. We also practised answering comprehension questions by using the question to help give a full answer. We reviewed the punctuation of lists and introduced the use of a colon. Later in the week we planned and wrote a recount which was a sequel to one we read.

In Maths we have been investigating different types of numbers. Following work with factors we explored prime numbers then we tried to solve a problem with square numbers and finally we found out about cube numbers.

In computing this week we continued to write code that has loops that make the computer play songs. We are working to display this work by compiling it using different software and presentation techniques.

Continuing our study of mountains, this week we used the atlases to locate major mountain ranges and consider the processes behind their formation.

Finally, in DT on Friday, we planned a decorative panel for our textile product and continued to practice different stitches and techniques.

### Ambassadors of the Week

Joe— for showing more commitment and quality in his learning

Aron —for being excellent at moving into space when playing rugby

### Information for Families

Not long until Sayers Croft—have you got your talent ready?
