19th April 2018

'May the force be with you.'

This Week...

In English we have returned to fiction. We have focused on mystery stories and tried to establish features of this genre. We have revised the use of adverbial phrases to provide important information and reviewed the use of paragraphs. When do we use them and why?

In Maths we have been adding and subtracting decimals using the column method. We have solved problems as well.

In P.E, this week, we have started to focus on athletic skills and field games. On Wednesday we focused on footwork and how this is important when playing tennis and on Thursday we ran. We focused on technique and personal targets—measuring and trying to improve.

In Science we got back to practical learning. We learned about the force of gravity by dropping an object into flour and measuring the crater. We then wrote a quick fact file about Sir Isaac Newton.

Ambassadors of the Week

Leighton — for his knowledgeable and thoughtful comments in history

Fran— for her success with column addition and subtraction

Information for Families
