Spring 23rd February

Some re- cent pic- tures

This Week...

After the classic stories of Shakespeare we returned to more classic literature—The Emperor's New Clothes. We have used this text to learn about writing reports. We learned about the features of this genre as well as the punctuation of parenthesis. We then wrote a report about this classic story.

In Maths we have taken a short break from fractions but only to learn about decimal fractions. We have focused on understanding place value and comparing decimals.

Science this week has been about the lifecycles of mammals. We looked at differences between birds and other mammals. We also discussed and compared gestation periods of different mammals.

In Computing we learned about the criteria we should use to evaluate websites. We looked at some websites that had some 'interesting' content and then applied our criteria. This should help when we need to research on the internet.

Ambassadors of the Week

Abi — who has focused hard to understand place value in decimals.

Matthew K — who showed his understanding of decimal place value through his use of Maths vocabulary.

Information for Families

Juniper Hall - the weather forecast is cold. So please ensure your child is dressed appropriately.

Thursday - World Book Day. Pyjama day.
