Planning Our 60 Second Shake- speare

This Week....

Welcome back.

In our little Shakespearean world we have been planning and writing a modern script. We have transposed a scene from *Macbeth* into more modern speech. We have also tried to create new words in the same way the 'bard' did in his plays. We aim to film our short plays.

During Maths we have been looking at decimal fractions. We have tried to solve and write place value riddles and we have been reviewing what happens when a decimal is multiplied or divided by 10, 100 or 1000.

In Science we have been exploring different environments and habitats that animals live in. We have looked at lifecycles of different classes of animal, compared them and thought about how the environment they live may have an influence on that lifecycle.

In Gym we have been refining our use of small apparatus while extending our use of shapes and pathways focusing on the control of our body movement.

Ambassadors of the Week

Zain— for sharing his experiences and knowledge of Islam

Kimi — for starting to positively contribute in French lessons.

Information for Families

Next Week—Book Week
(Thursday -Dress Up Day)
Eye Heroes Workshop
