

# YEAR 6 LEARNING NEWS

## Learning Highlights...

In maths this week we have been converting units of measurement including g into kg and cm into m and mm. We had great fun measuring each other and recording lengths in different ways. We even tried converting miles into kilometres and planned a trip around northern France.

We have also been looking at time including analogue and digital 24 hour clocks. Please practise at home to make sure children are really secure on telling the time.

Issue No 13 Autumn Term

## Learning Highlights

We have started a new unit of science learning and will be finding out all about electricity. We spent Monday afternoon investigating simple circuits and the effects of adding more than one component or cell.

## Star of the Week.

This week Star of the Week goes to Holly. She has worked hard and always with a smile on her face. Well done Holly.

## Information for Parents
